PARAS MULWANDE

Data Science & AI Builder | Python • SQL • Machine Learning | Turning Ideas into Real Projects

+91 8007752979 | parasmulwande@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

MCA graduate (2025) with hands-on Python, SQL, and machine learning project experience, seeking entry-level Data Science and AI/ML roles. Built PREDICROP, a Flask and MongoDB web application with four modules, using a Random Forest crop classifier (22 classes, 2,200 records) and a ResNet9 CNN in PyTorch (38 plant disease classes). Author of applied ML research (IJARSCT journal, ETRCEE-2025 conference) and currently building an AI video-processing tool. Completed an AI internship at InAmigos Foundation.

TECHNICAL SKILLS

Programming Languages: Python, SQL
Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn
Machine Learning: Scikit-learn, Model Development, Classification, Regression, Random Forest, XGBoost, Decision Tree
Deep Learning: PyTorch, CNN (ResNet9), TensorFlow/Keras
Web Development: Flask, HTML, CSS, JavaScript
Databases: MongoDB
Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code

PROJECTS

PREDICROP (Agri-Weather) — Smart Crop Management System *Completed*

Python, Flask, Scikit-learn, PyTorch, MongoDB, OpenWeather API, HTML/CSS/JavaScript

- Built a full-stack crop advisory web application in Python and Flask with four modules: crop recommendation, plant disease detection, fertilizer guidance, and weather forecasting.
- Developed a Scikit-learn Random Forest classifier to recommend crops across 22 classes from a 2,200-record dataset using soil and climate features.
- Implemented a ResNet9 convolutional neural network (CNN) in PyTorch to classify 38 plant disease classes.
- Integrated the OpenWeather API with the Flask application for weather forecasting and connected the application to MongoDB.

VALORCUT AI *Ongoing — 2026*

Python, AI/Video Processing

- In progress: building a Python-based AI video-processing tool to detect and extract highlight moments from VALORANT gameplay footage.
- Planned / in development (not yet completed): speech-to-text captions, caption translation, and automatic 9:16 vertical reframing for short-form video.

EXPERIENCE

Artificial Intelligence Intern | InAmigos Foundation *21 September 2026 – 4 October 2026 | Remote*

- Explored AI tools and their practical applications for research and productivity workflows.
- Completed AI challenges in three domains (education, business, and agriculture), proposing practical AI-based solutions.
- Designed an AI awareness infographic on protecting personal information and using AI responsibly.
- Recognized as a Top Performer during the internship and received a Certificate of Appreciation for dedicated efforts and valuable contributions, reflecting responsibility and commitment.

Freelance Graphic Designer & Design Team Lead

- Led a team of 3–5 designers, allocating tasks and conducting design reviews to maintain delivery quality across approximately 6–15 client projects.
- Managed client communication end to end, gathering requirements and coordinating revisions across client projects.
- Produced branding, social media, website/app visuals, and video/reel edits using Photoshop, Illustrator, and Canva.

RESEARCH & PUBLICATIONS

Agri-Weather – Smart Crop Management — International Journal of Advanced Research in Science, Communication and Technology (IJARSCT), Vol. 5, Issue 12 *April 2025 | DOI: 10.48175/IJARSCT-25960*

Agri-Weather – Smart Crop Management — International Conference on Emerging Trends and Research in Computer & Electronics Exigencies (ETRCEE-2025) *June 2025*

EDUCATION

Master of Computer Applications (MCA) *2025*

K. D. K. College of Engineering, Nagpur — Affiliated with RTMNU

Bachelor of Science in Information Technology (B.Sc. IT) *2022*

Prerna College of Commerce, Nagpur — Affiliated with RTMNU
